

Yesterday was an exciting, action-packed day at NTDC, as the first group of competitors were put through their paces with the skills course and pre-trip inspections. Today, the second group will compete in the same two areas.

The skills course is not for the faint of heart. Its popularity comes from how demanding and unforgiving the obstacle course can be. Drivers maneuver their vehicles through six obstacles, demonstrating their skills in braking, parking, turning, backing and maneuvering into and through tight spots. These simulate the challenging driving situations drivers face every day - but to the extreme.

Throughout the exercise, safety remains critical. In a competition, one small mistake may cost you the championship, but in the real world, it can spell the difference between a safe journey and an accident. We'll soon find out who the top drivers are and who's going to advance to the championship finals.

Go, Go, XPO!
