

Overview

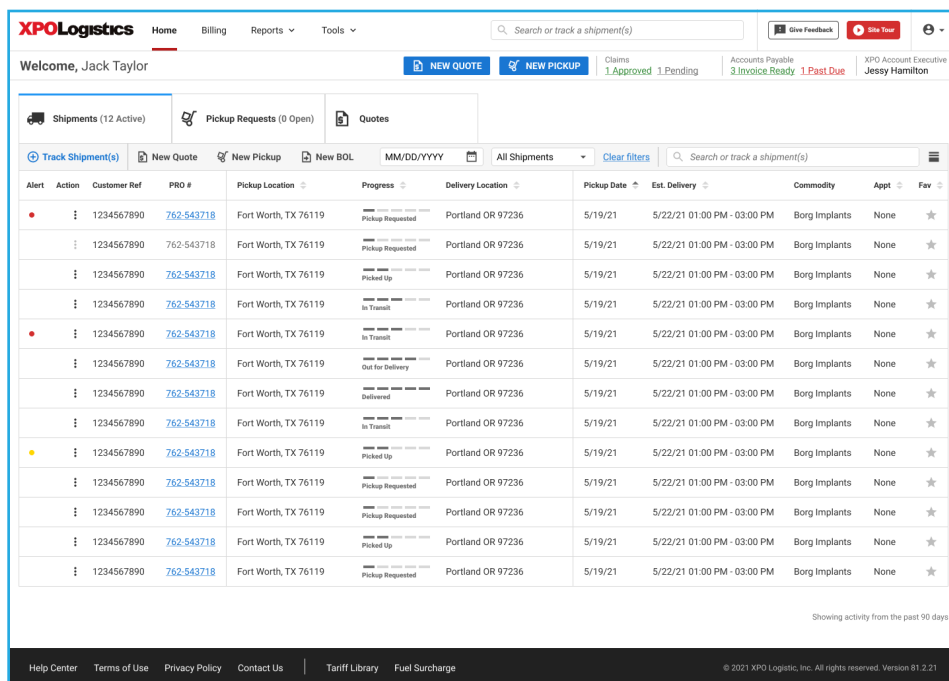

XPO's website has been updated to make it:

- Easier to navigate
- Provide greater information to customers with fewer clicks
- Offer enhanced online services such as online payments

Customers must be registered to use some features on the website. Registration is free and easy.

Home Page

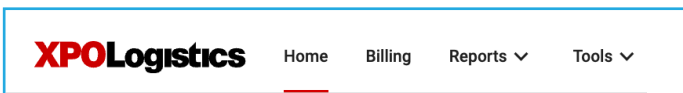

Once customers login to the website, they'll see the new **Home Page** which automatically opens to the **Shipments Tab View**. It looks much different than the previous one but offers much more functionality.

Navigation

Updated navigation makes the site easy to use. There are three navigation sections:

Top Navigation Bar, located at the top of the screen next to the XPO logo:

Home – always takes you back to the main screen

Reports – this is where customers will go to find reports such as manifest and shipment summary reports

Tools – here, customers will find things like Transit Time Calculator, Density & Class Calculator, Service Center Locator, and more
